

TriMark Scientific, formerly R.W. Smith, designs and installs custom walk-in freezers for various medical, industrial, and research applications.

PRECISION AND EFFICIENCY

Our Freezer Rooms are custom engineered to accommodate material testing, as well as evidence, mortuary, medical, pharmaceutical, and stability storage.

These modular rooms accommodate a range of small scale to warehouse requirements and dehumidification options are available to prevent unwanted ice accumulation.

STANDARD FEATURES

- ◇ PID temperature controls
- ◇ Modular insulated panels, R28+
- ◇ Ceiling and surface finishes
- ◇ A2L compliant refrigeration systems are available for new rooms.

Room panels feature corrosion-resistant white aluminum (custom stainless steel and other finishes are available).

RELIABLE PERFORMANCE

- ◇ Custom adjustable setpoints, from low to ultra-low, with tolerances to $\pm 0.5^{\circ}\text{C}$
- ◇ Desiccant or refrigeration-based dehumidification
- ◇ Design-build and turnkey solutions are engineered to scale

AVAILABLE OPTIONS

INCLUDE, AND ARE NOT LIMITED TO:

- ◇ Partlow chart recorders
- ◇ Anti-static options and accessories
- ◇ Extended warranty
- ◇ Redundant or semi-redundant systems
- ◇ Custom fixtures, shelving configurations
- ◇ Custom room configurations & finishes
- ◇ Custom door sizes and entrance ramps
- ◇ Insulated view windows
- ◇ Key card and other secure access
- ◇ Scalable, turnkey solutions, consulting, *and more*
